Documented incidents

The publicly reported incidents below are not a complete nor a representative list of all incidents that affected the provision of health care between 01-15 September 2026. The incidents below have not been verified through ground investigations. There is a delay in reporting incidents due to our open source verification protocol.

05 September 2026: In Kauda locality, South Kordofan state, a doctor and director of medical supplies was detained by SPLM-N. **Source: Darfur24**

06 September 2026: In Al-Daein locality, East Darfur state, a prominent orthopedic surgeon was arrested from his clinic at Al-Rida Medical Centre during a raid on the facility by RSF. He was reportedly taken to RSF offices. **Source: Darfur24**

13 September 2026: In Kulbus town and district, West Darfur state, the vicinity of a rural hospital, a market and a customs office were struck by a suspected SAF drone strike. An unspecified number of people near the hospital were killed and injured. **Source: Darfur24**

This document comprises threats and violence as well as protests and other events affecting the delivery of and access to health care. It is part of the **Attacks on Health Care** project by **Insecurity Insight**. It is prepared from information available in local, national and international news outlets and online databases. The incidents reported are not a complete nor a representative list of all events that affected the provision of health care and have not been independently verified. Join our **Sudan** mailing list for updates. Please **get in touch** to report an incident or if you have additional information on an incident we have reported on.

Other resources

Using data collected by Insecurity Insight, the Safeguarding Health in Conflict Coalition (SHCC) identified 134 incidents of violence against or obstruction of health care in Sudan in 2025. Among incidents reported in 2025, health facilities were damaged or destroyed 40 times, while 54 health workers were killed and 47 arrested. Over three-quarters of the reported incidents affected local health care providers working for national health care structures. Drone strikes impacting health care surged in 2025, increasing from three incidents in 2024 to 24 in 2025. Over 75% of armed drone strikes that impacted health care were linked to the RSF, with high incident numbers reported in North Darfur and North Kordofan states.

Armed drones are an escalating threat in humanitarian settings, with their use expected to grow. Once rare, they are now a defining feature in modern conflicts. Adapting to the growing threat of drones means rethinking security risk measures in high-risk contexts. This practical guide by Insecurity Insight brings together current best practice and is available in **Burmese**, **English**, **French** and **Spanish**. Individual resources:
